

AluRepair VISAR

ADVANCED

- 1200A Welding power.
- High energy efficiency.
- Parameter library for bolts from different manufacturers.
- Supports 4.000+ different job parameters.
- Perfect for steel and aluminium.
- Industry 4.0 capable.

A proven solution for the repair of modern automotive bodies in multi-material design.

A skilled operator is as essential as using the most advanced repair solutions. In our repair training seminars we provide the appropriate education for MMD and aluminium!

STATE OF THE ART

With AluRepair VISAR, the unique, powerful 3-in-1 system, allows for aluminium bits as well as any kind of studs, fasteners and ground studs up to a diameter of 12 mm [1/2"]. It can be welded reliably and special pull-out studs for the quick removal of punch rivets can be set.
